

I want to formally lodge a protest against the planned changes that would allow the expansion of Low Power FM broadcast service. I listen exclusively to K-LOVE and am concerned to hear that this new broadcast service could take priority over current FM translator service on which the K-LOVE signal is broadcast. K-LOVE provides positive, encouraging, wholesome programming--something rare in today's culture. Everyday, I hear people calling in to tell how something they heard on K-LOVE has positively affected them or their families. My own attitude has been improved countless times as I listen. Who can measure the impact this programming could be having on my area? Please act to ensure that the FM translators that K-LOVE is broadcast on are protected.

Sincerely,
Deborah L. Hubbard
